

DATA TRANSMISSION METHOD, APPARATUS USING SAME, AND DATA
TRANSMISSION SYSTEM

ABSTRACT OF THE DISCLOSURE

5

A data transmission method able to maintain the
quality of a transmitted image substantially same as that
of one's own image and an apparatus using the method and
a data transmission system, transmitting image data
10 accommodated in a frame of a preset frame during
communication between terminals, comprising capturing an
image including a target image to be transmitted, making
adjustments so that the target image to be transmitted
from the obtained image substantially fully fills the
15 image frame, and compressing and transmitting the
adjusted image data in the image frame.
